

Biosec with Dryset Pro: a program for everything

Thanks to the **Dryset Pro system's electronic controls**, there's an optimised, specific drying program for every product.

So easy: load the products in the trays, select the program required and the Biosec will dry every food to perfection.

You can **check the temperature** inside at any time during drying, and when the program finishes **the Dryset Pro maintains the products at the right level of dryness** for as long as you need.

fruit

vegetables

mushrooms

herbs

pasta

meat

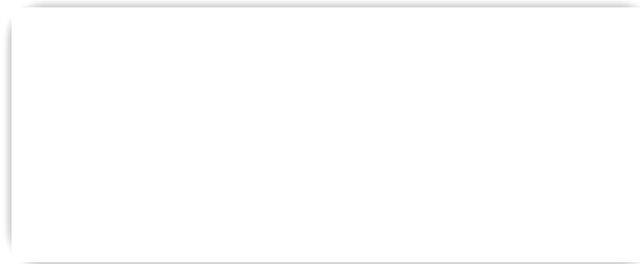

Drying at home, naturally.

Dryset Pro System

A new tradition

The Biosec is the exclusive **Italian-made** dehydrator that completes your cuisine with healthy, exquisite delicacies. To conserve the good taste of tradition in a new, original way.

Intelligent by nature

The **Dryset Pro system's electronic controls** make the Biosec an intelligent dehydrator: there's an optimised, specific drying program for every product. Artificial intelligence, natural drying.

Savings and results

The Biosec's programs are designed **to optimise energy use**. Perfect drying every time with minimal energy use, conserving all the raw materials' natural properties and saving you money.
